**Information available at mold-ram.com
is nothing to sneeze at**

(Roswell, GA) MOLD-RAM™, the new EPA-registered product for preventing surface mold and mildew, now has its own website at www.mold-ram.com. MOLD-RAM is a product of the Sostram Corporation.

The comprehensive website offers in-depth product information and includes zip code access to MOLD-RAM distributors and applicators. It meets the needs of several key audiences, including distributors who sell the product; mold specialists and pest management professionals who apply the product; and homebuilders, homeowners and others interested in preventing mold in homes and other buildings. Specific features of www.mold-ram.com include:

- product details
- how-to-use information
- distributor locator
- applicator locator and registration
- label and MSDS access

MOLD-RAM contains the active ingredient chlorothalonil, one of the world's most respected contact fungicides, and is an easily applied, sprayable product registered for use on wood, wallboard, concrete and masonry (cinder) block construction materials. It is ideal for use during new construction or to appropriate areas of existing structures and can be tank-mixed with borate products used for termite control and wood decay.
